

Frequently Asked Questions

Q: Do you have a preferred modeling software for this study (e.g., PCSWMM or HEC-RAS)?

A: We do not have a preference at this time.

Q: Which design/conveyance storm event should we model for the study area (e.g., 10-year/24-hour or 25-year/24-hour)?

A: We would prefer the 25-year/24-hour model.

Q: Do you have dates of previous high-water events we can use to pull associated rainfall data?

A: We do not have any dates for previous high-water events since we have put in our levee system.
